

Parts List:

- CAPACITOR (C1): 47uF, 16v
- CAPACITOR (C2): 1uF, 50v

Compatible EPROM's:

- M27C160 (2 MB)
- M27C322 (4 MB)

The DxS-GEN24TH-01 has 2 configuration options: **2MB** mode and **4MB** mode. If you're using a 2 MB EPROM (M27C160), solder both 2 MB pads together and if you're using a 4 MB EPROM (M27C322) then solder the 4 MB pads together.

NOTE: The PCB's do not require any capacitors and have been tested on multiple console models and revisions.
